

At Integra, it is no secret that new graduates are an essential part of our project delivery team! Over the past ten years, we have been recognized as one of Canada's Best Employers for Recent Graduates.

Our focus is on hiring individuals who have practical field experience and reflect the values of **INTEGRITY, FAMILY, EXCELLENCE & CREATIVITY.**

Key Duties and Responsibilities:

As a Junior Process Engineer, you will play a crucial role in our projects, contributing to the design, analysis, and facilities in the oil and gas sector. You will collaborate with multidisciplinary teams to ensure the successful execution of projects, while upholding our values of Integrity, Family, Excellence & Creativity.

- Assisting in the engineering design development of oil and gas facilities.
- Performing engineering calculations.
- Assisting in the preparation of cost estimates and project schedules.
- Communicating/coordinating with other departments, client representatives, vendors and contractors.
- Assisting with equipment and service procurement.
- Preparing technical documents.
- Actively engaging in ongoing learning and development activities to enhance technical skills.

Skills & Qualifications:

- Bachelor's degree in either Mechanical or Chemical Engineering.
- Registered as an EIT with APEGA or APEGS.
- Excellent written and verbal communication skills.
- Demonstrated mechanical aptitude.
- Ability to build relationships and network with ease, both internally and externally.
- Eagerness to learn.
