

INTEGRITY, FAMILY, EXCELLENCE, CREATIVITY

Senior Project Engineer

Elevate Your Career with Integra Engineering

For over 27 years, Integra has been a key player in the energy sector, specializing in EPC services for upstream and downstream oil and gas facility development. Our work spans Western Canada and has reached international markets such as Argentina and Yemen. Our commitment to quality, environment and safety is solidified through our ISO 9001:2015, ISO 14001:2015, ISO 45001:2018 as well as COR certifications.

Your Role with Us

Based out of Calgary or Lloydminster, as our Senior Project Engineer, you will be a hands-on working engineer, responsible for leading engineering projects, maintaining client relationships, and providing mentorship to intermediate and junior staff members. This is an opportunity to make a significant impact in a dynamic environment where your contributions will be truly valued.

Impact and Responsibilities

- Lead and manage projects from conception through completion, ensuring they meet scope, budget and timeline requirements.
- Conduct thorough reviews of engineering designs and deliverables to maintain high-quality standards.
- Build and maintain strong relationships with stakeholders, enhancing the company's reputation and securing future opportunities
- Interface with clients to assist in defining project priorities and keeps them up to date with project risks and opportunities.
- Establish client-driven approaches to the project lifecycle, including project planning, initiation, resourcing, and execution to monitoring, control to completion.
- Provide mentorship and technical guidance to junior and intermediate team members, fostering professional development and growth.
- Advise on technical problems, engineering standards and specifications.
- Participate in technical bid preparation for projects.
- Review and approve technical documentation such as Engineering Reports, DBMs, PEPs, SOWs, and engineering drawing sets.

Who We're Looking For

We are seeking a dynamic and seasoned Senior Project Engineer with a strong blend of technical expertise, project management and client relationship skills. The ideal candidate will possess:

- Demonstrable leadership skills and exceptional communication abilities, enabling strong connections across the company.
- Exceptional time management skills.
- A collaborative approach, with the ability to work closely with multi-disciplinary teams to ensure quality standards are met and projects are executed smoothly.
- A proactive and adaptable attitude, capable of thriving amidst changing project demands and priorities.
- Experience in fast-paced, technically driven, project-based environments.

Qualifications

- Canadian registered Professional Engineer (P.Eng.) combined with a PMP designation.
- A member in good standing of APEGA and/or APEGS
- 13+ years of applicable and progressive project management and design experience in various stages of projects
- Minimum 5 years of supervisory/mentorship experience
- Prior experience of acting as a company representative in dealing with contractors and clients.

Why Choose Integra?

Integra is more than a company; it is a place where you can make a real difference. We offer a competitive compensation package, including an attractive base salary and comprehensive benefits. Join us and contribute to a company that values integrity, excellence, creativity and a sense of community.
